Quality

All our products are manufactured from the highest quality materials and undergo meticulous examination to ensure only the best products reach your door. We believe strongly in the quality, integrity, and reliability of our products and offer a lifetime warranty on all Jeffrey Alexander decorative hardware.

Designs

Inspiration comes from the latest styles in interior design to the newest fashion trends on the runway. That inspiration is creatively transformed into beautiful hardware for any kitchen, bath, or home project. Our designs are heavier in weight with solid or flat backs, not hollow backs, adding a touch of luxury while providing a comfortable feel in your hand.

GRACEFUL

Create a snag-free space (like in closets and laundry rooms) by choosing pulls that have feet that touch the face of the cabinet instead of having an overhang.

Comfortable

Subtle curves, a broad profile, and square feet make Merrick's simple strap pull anything but boring. A comfortable choice for various cabinet styles, this pull family's versatility makes it a popular preference.

Design Idea

When using two contrasting cabinet finishes, choose the same finish for knobs and pulls to tie everything together, or opt for various finishes that complement the cabinet color, adding more personality to a space.

SUBTLE

A subtle reflection of a warded lock key, Knox pairs leading lines and intentional curves for a simple yet distinctive look. This closed-ended bar pull series offers a generous 1" hand clearance for an aesthetically pleasing option for aging in place and ADA projects.

Design Idea

When choosing hardware, think about how often the drawers or doors are used, as well as who the user is. Longer pulls and pulls with a larger hand clearance are easier to grab, especially for users with limited hand mobility.

Cabinet Hardware Selection & Sizing Guide

Need some help choosing hardware for your cabinets?
Although there are no formal rules for hardware selection, there are some guidelines you can follow that can help you select the hardware that best fits your style and budget.

Knobs vs. Pulls

Knobs are smaller on the cabinets and are a suitable choice when you want to highlight the beauty of your cabinets or backsplash. They work best on cabinet doors.

Pulls are larger than knobs and can make a more significant statement than knobs alone. They also make opening doors/drawers easier and are available in multiple sizes to add variety and give your cabinets a more customized designer look.

You could opt for knobs on upper cabinets and pulls on lower cabinets...

...or choose all pulls for a streamlined, modern look

Pull Sizes

Remember, there are no set rules, so choose the length that best complements your cabinets and the level of functionality needed. **Pro Tip:** Selecting a cabinet pull that is at least $\frac{1}{3}$ the length of the door and $\frac{1}{3}$ to $\frac{1}{2}$ the width of the drawer is always a safe choice.

Choosing longer cabinet pulls makes it easier to grip and access your doors and drawers, increasing the functionality of your space while creating a clean and modern, high-end look.

Pull size is $\frac{1}{2}$ the width of the drawer

OR...

Pull size is $\frac{1}{3}$ the width of the drawer

Pull size is $\frac{1}{3}$ the height of the door

Available Finishes

All brushed, antique, and distressed finishes are created by hand to add texture to the item. We hold a tight range of acceptance for color variation, however, a slight variance in the texture and tone of these items can occur. We consider these variances to be minimal; slight variations are normal.
